

HUMBOLDT

Extreme-Duty Whisks

H-3843AHW

Custom-Made, Extreme-Duty Whisks

Designed to stand up to the abuse of mixing aggregate-laden, asphalt mixes, Humboldt's Extreme-Duty Whisks can outlast normal whisks and paddles by years. All Extreme-Duty Whisks are constructed from 1/4-inch diameter stainless steel rod and fused to custom-made stainless steel hubs.

Whisks can be ordered to fit specific Hobart Laboratory Bench Mixers, as well as special-ordered for other mixers (please inquire).
